I would very much like to continue to receive my xm radio programing as it is currently. In fact, you could add many more channels and I would be happy. I travel around wyoming, Montana, North Dakota, and South Dakota regions and do not have a lot of local channels to choose from, in fact almost none in the mountain ranges and flat lands. If you are lucky enough to receive a local signal, most of the time it is so full of static that you turn it off. I appreciate my xm radio to be able to listen to my news, weather, comedy, and other old time programing. To take this away would be a great disapointment as I view this as a valued service to business travelers such as myself that I pay for. Currently there is no traffic for my area, however I'm sure that with the growth of xm radio it will only be a matter of time before I can have this feature also. In fact, I look forward to it. I listen to the weather daily for my area as I drive over my 4 state area. This is an invaluable asset to me and I would be extremely disappointed to loose this station. Being one of the only vehicles on the road from time to time you need access to instant weather programing. To take radio stations away from me that I purchase is not fair if I'm not allowed a say in the decision. I humbly ask that you please reject the NAB's petition 04-160 and to support the freedom of having xm radio. Thank you for your time and attention. Bill Miller.
